

WHAT IS HOMOEOPATHY ?

Homoeopathy is a system of medicine which uses natural substances in micro doses to trigger a healing response on a physical, mental and emotional level. Over 200 years of proven clinical effectiveness have made homoeopathy the second most widely used system of medicine in the world, as acknowledged by the World Health Organisation (WHO). Homoeopathic medicines taste good, are non-toxic, non-addictive and cost effective.

QUOTES FROM HAPPY CLIENTS

I was 6 months pregnant and hospitalised with severe pain from a cyst on the fallopian tube. After a week in hospital with no relief my mother suggested I see a homoeopath. A remedy was prescribed and I took my first dose at 1:00pm. I continued to use the remedies and the cyst gradually disappeared over the next few months. I had a trouble free delivery using other homoeopathic remedies.

- Nicole

Lucy's bed wetting and nose bleeds have stopped since we started on that homoeopathic remedy.

- Monique

My 11 yr old has had asthma all his life but since starting on Homoeopathy, he hasn't needed his puffer once.

- Dania

Homoeopathic remedies eased my grandson Ethan's teething crises. The pain and fever were quickly relieved without the need for paracetamol. It has also helped with his episodes of really feral behaviour.

- Jeannette

Caleb was in and out of hospital with high fevers. It's great that I can now stop him going to hospital by using Homoeopathy. It's saved me money too. Looking after a little one in hospital is so expensive.

- Sallyann

I prefer to use my homoeopathic remedies for my sick children. The good thing about Homoeopathy is that it covers a huge range of problems.

- Wendy
